

**Children's Theatre: "Flying Umbrella". The importance of Environmental Protection  
Brought to life!**

**Nicosia 15<sup>th</sup> April: The EU Infopoint is organizing its first children's event to raise awareness about protecting the environment on 18<sup>th</sup> of April, Saturday from 11:00 to 13:00 at the EU Infopoint premises. Nicosia City Theatre's children's play "Flying Umbrella" will be performed at the event.**

The EU Infopoint aims to increase awareness about the environment and for children theatre is a fun and powerful medium to pass on a strong message about how to be a responsible citizen and how to care for the environment. In order to protect, preserve and improve the environment for present and future generations, the European Commission proposes policies that ensure a high level of environmental protection in the European Union and to preserve the quality of life for EU citizens.

Awareness raising is the first step in ensuring the environment is protected. Especially for children it is important to give access to new and fun experiences. That's how they learn. Children need to start thinking and caring about the environment from a young age in order to ensure that environmental protection becomes a reality that is passed on to future generations.

The "Flying Umbrella" performance is targeted at primary school aged children. Participants will also be provided with a small environmental themed colouring book and refreshments will be served after the show. Places are limited so please RSVP by 17 April by contacting Elvan Aragul on (0392) 228 2576 or [elvan.aragul@abbilgi.eu](mailto:elvan.aragul@abbilgi.eu).

The EU Infopoint aims to bring the Turkish Cypriot community closer to the European Union by providing information on the EU legal and political order, EU policies, values and the EU Aid Programme for the Turkish Cypriot community.
