

Raising awareness for SMEs on energy efficiency

NICOSIA, 17 APRIL: The EU Infopoint is organising a panel discussion on energy efficiency targeting SMEs on Tuesday, 21 April 2015 from 3 pm to 5 pm. The event brings together energy efficiency experts, energy auditors and SMEs to examine and discuss how energy efficiency could improve competitiveness and support sustainable economic development.

Reducing energy consumption and eliminating energy wastage are among the main goals of the European Union's energy policy. The EU supports energy efficiency for competitiveness and for meeting the commitments on climate change.

The panel will provide information on efficiency in water and electricity use which can be implemented by SMEs, examples from other EU countries, new developments on energy efficiency, sustainable energy systems and sample implementations in the Turkish Cypriot community. There will also be a discussion on energy audits and how an energy audit is conducted. SMEs interested in participating in the event can register by 20 April by contacting Elvan Aragül on (0392) 228 2576 or elvan.aragul@abbilgi.eu.

The EU Infopoint aims to bring the Turkish Cypriot community closer to the European Union by providing information on the EU legal and political order, EU policies, values and the EU Aid Programme for the Turkish Cypriot community.
